DETAILED ACTION

EXAMINER'S AMENDMENT

The application has been amended as follows: In the Abstract, the 1st line through the 2nd line, after the word “aligning”, the wording “a diffraction grating align” has been deleted.

Allowable Subject Matter

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance:

As to Claim 1, the prior art of record taken along or in combination, fails to disclose or render obvious displacing the diffraction grating such that an arranging direction obtained from the diffracted light pattern is aligned in the predetermined direction, in combination with the rest of the limitations of the claim (for support, see p. 14-15 of the specification, line 29-35, 1-5, Figs 1, 5, and 7b).

The dependent Claims 2-4 are allowed by virtue of their dependence upon Claim 1.

As to Claim 5, the prior art of record taken along or in combination, fails to disclose or render obvious a control device for controlling the displacing device to displace the diffraction grating such that the direction of an arranging direction obtained from the diffracted light pattern detected by the detecting device is aligned in the predetermined direction, in combination with the rest of the limitations of the claim.

The dependent Claims 6-14 are allowed by virtue of their dependence upon Claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fay et al (US 4,311,389) teach a method for optical alignment designs in two near planes.
